

FINANCIAL AND HUMAN RESOURCE MANAGEMENT FOR HIGHER EDUCATION

Microsoft Dynamics applications streamline institutional budgeting, financial reporting, and cross-departmental communications.

With federal and state education funding reductions, escalating student enrollments and shrinking endowments, colleges and universities are challenged to meet national accounting and reporting standards – and provide more timely and accurate financial reports.

Microsoft® Dynamics™ GP (formerly Microsoft Business Solutions-Great Plains) offers business officers and financial directors much-needed tools to budget, plan and integrate financial data across administrative departments.

Microsoft Dynamics GP streamlines organizational functions, including:

- Core Financials
- Human Resources/Payroll
- Student Information Systems
- Alumni Management Systems
- Student Records and Case Management
- Call Center Management
- Fund Accounting
- Grant Management
- Billing Systems

Ensure budget control with powerful financial management solutions.

Microsoft Dynamics GP and our Microsoft Certified Partners help university administrators prepare and deliver accurate financial reports which easily and securely share information and data.

By integrating with legacy systems, we help you improve internal communication between departments or multiple campuses. Customized reporting modules provide detailed, up-to-the-minute financial reports that allow you to make informed purchasing decisions, comply with reporting requirements, and ensure effective use of funds.

Our solutions enable registrars and financial directors to produce timelier, accurate reporting on their financial data and allow auditors to justify encumbrances and demonstrate eligibility for state and federal financial programs.

Colleges and universities can use Microsoft Dynamics GP to streamline processes and implement cross-departmental procedures. With advanced capabilities to reduce transaction entry steps and increase general ledger accuracy, you'll gain new levels of audit control and trail support.

 Microsoft Dynamics®

Share data and information on campus – and far beyond.

Microsoft Dynamics GP makes it easier to report on information and share those reports with other university or college departments, including those far from the school's physical boundaries. The familiar Microsoft interface makes Microsoft Dynamics GP easy-to-use and enables you to share critical reports quickly and securely.

Users can quickly export Microsoft Dynamics GP reports to Microsoft Office Excel with just a few clicks, enhancing understanding of key business information and reducing the labor required to create tables and charts.

With improved reporting, you're able to feed more accurate data back to auditors – and significantly increase your ability to qualify for additional grant funding. Most importantly, our tools help you maximize your funding and deploy it effectively so you never have to return unused funding.

Get help in managing a spectrum of human resources and payroll.

Because professors and administrators are paid from many different sources and on different schedules, the university needs a flexible payroll management solution. Our unrestricted education and general accounts and auxiliaries provide your human resources department with customizable pay period management, tenure tracking, and personnel budgeting capabilities.

Plus, insightful “what if” scenario options to calculate staff raises or return on investments make budgeting and planning far simpler and much more accurate. With a simple click, now you can find out what a 3% across-the-board faculty raise will do to your budget for this year – or the longer-term. With another fast click, recalculate the forecasts at a 3.2% increase!

Keep pace with your students – they're everybody's future!

Prepare your institution for the “next generation” of techsavvy students who expect their future alma mater to be as technologically advanced as they are! Our solutions keep you on the path toward institutional greatness – and operational efficiency.

Improve your institution's internal and external reporting capabilities. Look up individual student records or aggregated student data in a matter of minutes. Establish, update and revise classroom and faculty schedules. Send private information securely across the Web. This is all possible – and even simple – with Microsoft Dynamics GP.
